PERMITS 101: WHAT YOU NEED TO KNOW

Join us for an engaging workshop led by Pinole's Chief Building Official, Keith Marks. You'll get practical tips on navigating the permitting process for home improvements—**what requires a permit, what doesn't**, how to avoid common mistakes, and where to find support along the way. This friendly conversation is perfect for homeowners, caregivers, or anyone planning upgrades to make their home safer and more accessible. This is the second workshop in the six-part Pinole Accessible Living (PAL) Series, made possible through a grant from the AARP Community Challenge.
